

MANDARIN[®] MUNCHKINS

THE LEGEND OF MOON FESTIVAL

A long time ago, there were ten suns in the sky, and they made the earth very, very hot.

A brave man named Hou Yi shot down nine of the suns so people could live safely. As a thank you, he was given a magic drink that could make him live forever. But Hou Yi didn't want to live without his wife, Chang Er, so he kept the drink hidden.

One day, a bad man tried to steal it. To keep it safe, Chang Er quickly drank it. Right away, she floated up into the sky and landed on the moon, where she still lives today. Hou Yi missed her so much. Every year, when the moon is round and bright, he would put her favourite foods outside and look up at the moon, hoping to see her.

And that's why people say Chang Er is up there, watching over us from the moon!
